Maximilian Hartley
SOFTWARE ENGINEER

futureproof

I am a climbing, coffee and coding enthusiast with a passion for learning and self development. From a young age I pursued a wide range of hobbies including juggling and solving Rubik's cubes. When something captured my interest, I was driven to hone my skill until I reached a high level of proficiency. Over time, my curiosity was piqued by both computers and mathematics, and so, learning to code came as a natural choice. Starting as a self taught developer and I was quickly captivated by the logic and flow of software development. Every obstacle in coding has been a pleasure to overcome and I am eager to apply my skills in a professional environment.

SUMMARY

I attained a Bachelor of Science in Mathematics from the University of Birmingham and I am currently training as a Full Stack Developer with futureproof. I began learning to program in my spare time via the Codecademy web development course whilst working in my previous role. After publishing several small websites for local businesses, I decided to pursue further career development with futureproof.

My experience working in sales taught me the discipline required to succeed in the constantly evolving world of technology and the interpersonal skills to work suneraistically as part of a team. I am excited to embrace every new challenge, advance my knowledge and contribute to new and dynamic technologies.
